

BIOSTACK

Public Legal Policies

Terms, privacy, consumer health data, calculator safety, cookies, and subprocessors

Version	0.10.0-draft
Prepared	August 28, 2026
Status	Operator and licensed-counsel review required; confirmation gates remain open
Launch baseline	U.S. adults 18+, hosted account platform, restricted provider pilot

BioStack Terms of Use

Version: 0.10.0-draft

Effective date: August 28, 2026

Legal operator: Morgan Findings LLC, Georgia ("BioStack," "we," "us," or "our")

Mailing address: 1800 Twin Branch Dr., Marietta, GA 30062

These Terms of Use form a binding agreement between you and BioStack concerning your access to and use of the BioStack websites, free public source-graded evidence library, applications, calculators, knowledge materials, exports, paid tracking and analysis layers, provider-pilot features, and related services (collectively, the "Service"). Read them carefully.

1. Acceptance and policy versions

By creating an account, clicking an acceptance control, or using the Service after being shown these Terms, you agree to these Terms and acknowledge the Privacy and Consumer Health Data Policy. If you do not agree, do not use the Service.

BioStack records the version presented, acceptance time, and related consent events. Material changes require new notice and, where required, renewed affirmative consent. The Privacy and Consumer Health Data Policy and Calculator Safety Notice are incorporated into these Terms.

2. Eligibility and age attestation

The Service is intended only for individuals who are at least 18 years old and located in the United States. By using the Service, you attest that you are at least 18 and have legal capacity to enter this agreement.

Do not use the Service if you are under 18, are using it on behalf of a minor, or are prohibited from using it under applicable law. We may suspend access and delete information as permitted by law if we reasonably believe an account is being used by or for a minor.

3. Educational and observational purpose only

BioStack provides a free, public, source-graded evidence library, with optional paid tracking and analysis layers.

BioStack is a recordkeeping, mathematical, educational, and observational tool. It is not a physician, pharmacist, laboratory, health care provider, emergency service, medical device clearance, prescription service, or substitute for professional judgment.

The Service does not diagnose, prevent, treat, cure, prescribe, recommend a dose, establish that a substance is safe or effective, verify product identity or purity, or determine whether a protocol is appropriate for any person. A citation, evidence tier, pathway label, compatibility label, pattern, alert, correlation, or Commander output is not medical advice and is not proof of causation.

Always consult a properly licensed clinician or pharmacist for decisions about symptoms, conditions, medications, supplements, peptides, investigational products, injections, combinations, or changes to care. Never delay or disregard professional advice because of the Service.

If you may be experiencing an emergency, contact 911 or the appropriate local emergency service. BioStack does not monitor the Service for emergencies.

4. Calculators

Calculators perform mathematical transformations using the values you enter and stated formulas. They do not select or approve a dose, concentration, route, substance, vial, syringe, schedule, or protocol. An output is not a safety determination.

You are responsible for checking every input, unit, assumption, formula, and output independently. Do not use a calculator output to prepare, administer, or change any substance unless a qualified licensed professional has independently confirmed the underlying instruction and calculation. The Calculator Safety Notice contains additional restrictions and is part of these Terms.

5. Compounds, protocols, and investigational products

BioStack does not sell, prescribe, dispense, authenticate, endorse, or arrange the purchase of drugs, peptides, supplements, or investigational products. Inclusion of a substance or source in the Service is not an endorsement and does not mean the substance is approved, lawful, safe, effective, sterile, correctly labeled, or appropriate for human use.

You are solely responsible for compliance with applicable laws and professional instructions. You may not use the Service to facilitate unlawful acquisition, distribution, prescribing, compounding, administration, or concealment of regulated or investigational products.

6. Commander and analytical outputs

Commander and other analytical surfaces may organize user-entered records, cited literature, temporal sequences, reported outcomes, and possible associations. These outputs are hypotheses or observations for human review. They may be incomplete, stale, wrong, confounded, or unsuitable for a particular person.

Commander may not be treated as a clinician, prescriber, diagnostic system, causal authority, or autonomous decision-maker. You must not represent its output to another person as a verified medical conclusion.

7. Evidence and third-party materials

Scientific sources, summaries, evidence tiers, and citations are provided for convenience. BioStack does not promise that materials are complete, current, error-free, peer-reviewed, applicable to humans, or applicable to you. Research findings may conflict or change.

Third-party links, publications, names, brands, and services remain the responsibility of their owners. BioStack does not control and is not responsible for third-party content, availability, privacy, security, or conduct.

8. Accounts and security

You must provide accurate information, protect credentials and devices, and promptly notify us of suspected unauthorized access. You are responsible for activity under your account except to the extent caused by our failure to use reasonable safeguards.

BioStack stores account and user-entered Service data on hosted systems. You remain responsible for device security and for securely storing or deleting any exports or copies you create. Loss of a device may expose local copies, but the authoritative Service records associated with your account are maintained by BioStack and its approved processors according to the Privacy Policy.

9. Your content and permissions

You retain ownership of information you enter or upload. You grant BioStack a limited, non-exclusive license to process that information only as necessary to provide, secure, support, and improve the features you deliberately use, comply with law, and enforce these Terms.

BioStack will not use identifiable consumer health data to train a general-purpose model, target advertising, or sell information unless a future policy clearly describes the proposed use and the user provides any legally required separate authorization. The current policy prohibits those uses.

Do not upload information you lack authority to provide. During a provider pilot, do not enter patient-identifiable information, protected health information, or records about another person unless BioStack has signed the required contract, completed privacy and security review, and explicitly enabled that use in writing.

10. Acceptable use

You may not:

- use the Service for emergency response, diagnosis, prescribing, dosing, treatment selection, or autonomous clinical decisions;
- rely on the Service as the sole basis for a health, employment, insurance, legal, or other consequential decision;
- use the Service for a minor or misrepresent age, identity, authority, or professional status;
- upload another person's sensitive information without lawful authority and any required notice or consent;
- attempt to bypass access controls, extract credentials, introduce malware, disrupt the Service, or probe systems without written authorization;
- scrape or reproduce protected content except as permitted by law;
- use outputs to market a product with unsupported medical, safety, efficacy, or regulatory claims;
- use the Service to violate law, professional duties, research rules, or third-party rights; or
- imply that BioStack endorses a provider, supplier, product, protocol, or conclusion when it does not.

11. Provider pilot restrictions

Provider-pilot access is a limited evaluation license. Unless a signed pilot agreement expressly says otherwise, the pilot is limited to synthetic, fictional, or properly de-identified data and may not be used in patient care, production workflows, an electronic health record, prescribing, dosing, treatment, diagnosis, emergency response, or billing.

Pilot participants must independently review outputs, report suspected safety or evidence issues, and follow applicable professional, institutional, research, privacy, and security duties. Pilot access does not create a clinician-patient relationship between BioStack and any person, and it does not make BioStack a HIPAA business associate.

A provider access request records the consent version presented and the time consent is recorded. That versioned consent record, together with the normalized email and request metadata, is the acceptance record for provider-pilot intake. Submitting a request does not create access or authorize use; requests remain subject to review, rate limiting, anti-abuse controls, and any required signed pilot agreement.

12. Privacy

Our Privacy and Consumer Health Data Policy explains what information we process, why, how long we retain it, when we disclose it, and how to exercise rights. BioStack can service verified access, export, correction, and deletion requests for account data it maintains, subject to the lawful retention exceptions described in that Policy.

13. Ownership of the Service

BioStack and its licensors own the Service, software, design, compilation, and associated intellectual property, excluding your content and third-party materials. Subject to these Terms, we grant you a limited, revocable, non-transferable, non-sublicensable license to use the Service for its intended purpose.

If you provide feedback, you grant BioStack a perpetual, worldwide, royalty-free license to use it without identifying you or disclosing your consumer health data.

14. Beta features and changes

The Service may include beta, preview, or pilot features. They may change, fail, produce incomplete results, or be withdrawn. Do not rely on availability, compatibility, data preservation, or continued support unless a signed agreement states otherwise.

We may update the Service and these Terms. We will provide notice of material changes and obtain renewed acceptance when required. Changes do not authorize materially new uses of previously collected consumer health data without the notice and consent required by law.

15. Billing, renewal, cancellation, and refunds

Observer is free. Operator costs USD \$12 per month, and Commander costs USD \$29 per month. BioStack currently offers monthly billing only; annual billing is not offered. Paid subscriptions renew automatically each month until canceled.

Stripe processes paid subscriptions and payment information under its own terms and privacy policy. BioStack does not receive or store full payment-card numbers. You authorize BioStack and Stripe to charge the disclosed monthly amount and applicable taxes using your selected payment method.

You may cancel through the available billing controls. Unless applicable law requires otherwise or BioStack expressly states otherwise, cancellation takes effect at the end of the then-current monthly billing period, fees already charged are non-refundable, and BioStack does not provide prorated refunds or credits for partial months.

If payment fails or a paid subscription is no longer in an active or trialing state, paid access fails closed and the account immediately reverts to the Observer tier without a grace period. BioStack may retry payment through Stripe and will restore paid access only after the subscription returns to an eligible state. Your content remains subject to the Privacy Policy and its retention and deletion terms.

16. Suspension and termination

You may stop using the Service at any time and request deletion as described in the Privacy Policy. We may suspend or terminate access for a material breach, security threat, unlawful use, risk to another person, pilot expiration, or discontinuation of the Service.

Provisions that by their nature should survive termination remain in effect, including ownership, disclaimers, limitations, dispute provisions, and obligations concerning prior conduct.

17. Disclaimers

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE SERVICE IS PROVIDED "AS IS" AND "AS AVAILABLE." BIOSTACK DISCLAIMS IMPLIED WARRANTIES, INCLUDING MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, ACCURACY, AVAILABILITY, AND RESULTS.

BIOSTACK DOES NOT WARRANT THAT OUTPUTS ARE COMPLETE, CURRENT, ERROR-FREE, CLINICALLY VALID, OR SUITABLE FOR ANY HEALTH DECISION. SOME JURISDICTIONS DO NOT ALLOW CERTAIN DISCLAIMERS, SO THESE DISCLAIMERS APPLY ONLY TO THE EXTENT PERMITTED BY LAW.

18. Limitation of liability

TO THE MAXIMUM EXTENT PERMITTED BY LAW, BIOSTACK AND ITS AFFILIATES, LICENSORS, AND PERSONNEL WILL NOT BE LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, EXEMPLARY, OR PUNITIVE DAMAGES, OR FOR LOST PROFITS, LOST DATA, LOSS OF GOODWILL, OR BUSINESS INTERRUPTION.

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THEIR TOTAL LIABILITY ARISING FROM OR RELATING TO THE SERVICE WILL NOT EXCEED THE GREATER OF USD \$100 OR THE AMOUNT YOU PAID BIOSTACK FOR THE SERVICE DURING THE 12 MONTHS BEFORE THE EVENT GIVING RISE TO THE CLAIM.

These limits do not apply where prohibited by law and do not limit liability that cannot legally be limited. Counsel must approve this section for the operator's launch jurisdictions before publication.

19. Indemnity

To the extent permitted by law, you agree to defend, indemnify, and hold harmless Morgan Findings LLC, BioStack and its affiliates and personnel from third-party claims arising from your unlawful use, violation of these Terms, infringement of another person's rights, or unauthorized submission of another person's information. This obligation does not apply to the extent a claim resulted from BioStack's own unlawful conduct.

20. Governing law and disputes

These Terms are governed by the laws of Georgia, without regard to conflict-of-laws principles. The state and federal courts located in [COBB, GEORGIA] will have exclusive jurisdiction, except where applicable consumer law provides otherwise. Before filing a claim, each party agrees to send written notice and attempt in good faith to resolve the dispute for 30 days.

This draft does not include mandatory arbitration or a class-action waiver. Counsel and the operator must deliberately approve any future addition of those provisions.

21. General terms

These Terms and incorporated policies are the entire agreement concerning the Service unless a signed agreement applies. If a provision is unenforceable, it will be modified only to the minimum extent necessary and the remainder will continue. Our failure to enforce a provision is not a waiver. You may not assign these Terms without our consent; we may assign them in connection with a merger, acquisition, reorganization, or sale, subject to applicable privacy law.

BioStack Privacy and Consumer Health Data Policy

Version: 0.10.0-draft

Effective date: August 28, 2026

Controller and operator: Morgan Findings LLC, Georgia, 1800 Twin Branch Dr., Marietta, GA 30062

BioStack provides a free, public, source-graded evidence library, with optional paid tracking and analysis layers.

This Policy explains how BioStack processes personal information and consumer health data. It also serves as BioStack's distinct Consumer Health Data Privacy Policy for laws that require one.

1. Scope and hosted-data custody

This Policy applies to BioStack websites, applications, support channels, pilots, account features, and other hosted features that link to it.

BioStack's running Service uses server-side persistence. When you create an account or enter, save, import, sync, submit, or otherwise provide information through an enabled Service feature, BioStack and approved processors receive and store that information on hosted systems as described in this Policy.

Information contained only in a copy or export you create outside the Service is controlled by you. The corresponding account data stored by the Service remains within BioStack's custody until it is deleted or de-identified under this Policy, subject to lawful retention exceptions.

2. Information we process

Depending on the features you use, we may process the following categories.

Account and contact information

Name or display name, email address, account identifiers, authentication records, organization, professional role, and communication preferences.

Consumer health and protocol data

Information you choose to record about age, sex, weight, goals, substances, medications, supplements, peptides, protocols, schedules, doses recorded after the fact, biomarkers, symptoms, subjective check-ins, side effects, diet, sleep, exercise, milestones, reported outcomes, source materials, and related notes. This category may include information from which physical or mental health status can be inferred.

Calculator information

Values entered into a calculator, selected units, formula version, and resulting mathematical output. Depending on the calculator and whether you save a result, these values may be processed in the browser, transmitted to a hosted API, or stored with your account records. The interface and collection notice should identify any saved or transmitted data.

Technical and security information

IP address, device and browser type, operating system, timestamps, application version, authentication events, request identifiers, security events, diagnostics, and strictly necessary cookie or session data.

Support and pilot information

Messages, files you deliberately attach, feedback, issue reports, pilot organization, evaluation notes, training attendance, and records needed to administer a pilot. Do not send patient-identifiable information or protected health information through support or a pilot unless a signed agreement and written authorization expressly permit it.

Public and licensed knowledge sources

Scientific citations, publications, transcripts, and source metadata used to maintain the educational knowledge base. These materials are not ordinarily personal information about a BioStack user.

3. Sources of information

We receive information:

- directly from you when you create an account, enter data, enable a feature, contact support, or participate in a pilot;
- automatically from strictly necessary service, security, and diagnostic functions;
- from an organization that authorizes your pilot access;
- from service providers acting under our instructions; and
- from public or licensed research and knowledge sources.

BioStack does not authorize data brokers to provide consumer health data for user profiling or advertising.

4. Purposes and authority for processing

We process information only for stated purposes that are reasonably necessary and proportionate.

Purpose	Categories	Operational authority
Provide an account and requested features	Account, technical, and user-selected health or protocol data	Contract and requested service
Perform user-requested calculations and recordkeeping	Calculator and user-entered data	User request; hosted processing or storage when transmitted or saved
Secure, debug, and maintain the Service	Technical, security, and limited account data	Legitimate security and service interests; legal duties
Provide support	Contact, support content, and limited diagnostics	User request and contract
Administer a restricted provider pilot	Account, organization, evaluation, and approved test data	Pilot agreement and participant request
Maintain educational evidence	Public or licensed source material and human review records	Legitimate product-quality interests
Comply with law and enforce terms	Relevant account, security, consent, and transaction records	Legal duties and legal claims

Where law requires consent for consumer health data, BioStack obtains a separate affirmative consent that identifies the data categories and collection purposes. Consent to collect is not consent to sell or share data for unrelated purposes.

5. Consumer health data collection and sharing

BioStack may collect the consumer health data categories described in Section 2 when you deliberately enter, import, save, sync, or submit them through an enabled feature.

BioStack may disclose consumer health data only:

- to a processor needed to provide a feature you requested and listed in the Subprocessor List;
- to a provider or organization you deliberately direct us to share it with, after an appropriate authorization flow;
- to protect a person, investigate security abuse, comply with valid legal process, or meet another legal duty; or
- as part of a transaction described in Section 12, subject to applicable law and this Policy.

BioStack does not sell consumer health data. BioStack does not share consumer health data for cross-context behavioral advertising, targeted advertising, data-broker enrichment, or advertising measurement. BioStack does not use identifiable consumer health data to train general-purpose models.

Any future proposal to sell consumer health data is prohibited unless the operator first changes this policy, implements the separate written authorization required by applicable law, and obtains counsel and executive approval. A generic acceptance of Terms is not such authorization.

6. Cookies and tracking

The initial release permits strictly necessary cookies and local storage used for authentication, security, preferences, load balancing, or core functionality. Non-essential analytics, advertising, replay, fingerprinting, and cross-site tracking are disabled.

If BioStack later enables a non-essential technology, it must update the Cookie Notice and provide an appropriate consent control before that technology loads where consent is required. See the Cookie Notice for details.

7. Automated analysis and Commander

Commander and analytical features may organize records, surface temporal patterns, summarize source material, or identify possible associations. BioStack does not authorize these functions to make decisions that produce legal or similarly significant effects. They are not authorized to diagnose, prescribe, determine treatment, or establish causation.

Human reviewers govern evidence and product claims as described in the Internal Governance Manual. Users and pilot providers must independently review outputs.

8. Retention

BioStack retains information only as long as reasonably necessary for the stated purpose, subject to the schedule below and legal holds.

Record	Draft retention rule
Primary account profile	While active; delete within 30 days after a valid deletion request or account closure, subject to lawful retention exceptions
Primary consumer health and protocol data	While the account or feature remains enabled; delete from primary systems within 30 days after a valid request
Production PostgreSQL PITR backups	Age out within the configured 7-35 day point-in-time-recovery window; exact setting must be operator-confirmed; data deleted from primary systems is re-deleted if a backup is restored
Weekly logical database backups	90-day lifecycle under the current operations runbook; data deleted from primary systems is re-deleted if a backup is restored
Decision Receipts and Governed Spine audit records	Permanent to preserve the append-only hash chain; access-restricted and pseudonymized where feasible; no product analytics, advertising, or unrelated use
Security and access logs	12 months unless a documented investigation or legal duty requires longer
Support records	24 months after ticket closure, with sensitive attachments removed sooner when no longer needed
Privacy and deletion request records	24 months after closure, excluding deleted health content
Policy acceptance, age attestation, and consent evidence	6 years after the relationship ends, limited to evidence of the event and not the underlying health content
Provider-pilot administration and audit records	6 years after pilot closure, excluding test health content unless a signed schedule requires otherwise
Stripe billing and transaction records	Under Stripe's retention terms and BioStack's applicable financial, tax, dispute, and legal obligations; counsel and operator to confirm
Financial and tax records	As required by applicable law, ordinarily 7 years

The operator must confirm this schedule against production PostgreSQL settings, backup lifecycle policies, Stripe terms, and applicable limitation periods before approval. BioStack may retain a minimal suppression record, transaction record, legal-hold copy, or integrity/audit record where reasonably necessary and permitted by law to comply with law, prevent fraud, preserve audit-chain integrity, establish legal rights, or honor a request not to contact you. Such records are access-restricted and are not used for product analytics, advertising, or unrelated purposes.

On a verified deletion request, BioStack deletes personal content from primary systems and instructs applicable processors to do the same. Integrity and audit records, including append-only, hash-chained Decision Receipts, may be retained in restricted and pseudonymized-where-feasible form when reasonably necessary and permitted by law to preserve chain integrity, comply with a legal hold or legal duty, prevent fraud, or establish, exercise, or defend legal rights. Licensed counsel must confirm this treatment under applicable consumer health data laws before publication.

9. Your choices and rights

Subject to applicable law and verification, you may ask BioStack to:

- confirm whether it processes your information;
- provide access to and a copy of information it holds;
- correct inaccurate information;
- export information in a portable, machine-readable format;
- delete information;

- identify categories of recipients and, where required, specific third parties that received consumer health data;
- withdraw consent for future collection or sharing;
- restrict or object to certain processing; and
- appeal a denied privacy request where applicable.

BioStack does not discriminate against a person for exercising a privacy right. We do not charge a fee unless permitted for requests that are manifestly unfounded, excessive, or repetitive.

To submit a request, use an in-product control or email [PRIVACY EMAIL]. We will verify the request proportionately. An authorized agent may submit a request where permitted, but we may require proof of authority and direct identity verification.

We target acknowledgment within 10 business days and completion within 30 calendar days. If applicable law permits a longer period, we will explain the extension. Deletion from encrypted backups may take up to 90 days as described above.

BioStack is responsible for servicing verified access, export, correction, and deletion requests for data held in its primary systems and will instruct applicable processors as described in this Policy. You remain responsible for copies or exports you keep outside the Service. Deletion rights are subject only to lawful and proportionate retention exceptions described in Sections 8 and 10.

10. Export and deletion behavior

An account export should include user-provided profile, protocol, check-in, timeline, consent, and other applicable records in a commonly used machine-readable format. A human-readable summary may be provided as a convenience but does not replace the machine-readable export.

Deletion removes or irreversibly de-identifies in-scope personal content from primary systems and instructs applicable processors to do the same. Restricted integrity and audit records, including append-only, hash-chained Decision Receipts, may be retained and pseudonymized where feasible under Section 8 when reasonably necessary and permitted by law. Deletion does not require BioStack to remove public research sources, information that does not identify you, records held solely by an independent recipient, or other minimal records lawfully retained under Section 8.

11. Security and breach notice

BioStack uses administrative, technical, and physical safeguards designed for the sensitivity of the information, including data minimization, access control, encryption where appropriate, logging, dependency management, and incident response. No system is perfectly secure.

If a breach affects information covered by a notification law, BioStack will investigate and provide legally required notice to affected people, regulators, and others. Do not send sensitive health information to [SECURITY EMAIL]; use that address to report a suspected vulnerability or incident and wait for secure transfer instructions.

12. Service providers, subprocessors, and transfers

BioStack uses only approved providers necessary to operate enabled features. The current public list appears in the BioStack Subprocessor List. Contracts must restrict providers to documented purposes,

require appropriate safeguards, address deletion and incident notice, and prohibit independent advertising use of consumer health data.

BioStack is operated from the United States. The initial Service is not directed to people in the EEA, United Kingdom, or Switzerland. Do not submit information from those regions until BioStack announces regional availability and provides the required controller, representative, transfer, legal-basis, and rights disclosures.

13. Business transactions

If BioStack is involved in a merger, financing, acquisition, reorganization, bankruptcy, or sale of assets, information may be reviewed or transferred as part of that transaction only subject to applicable law, confidentiality, security, and the promises in effect when the information was collected. A buyer may not make a materially incompatible use of consumer health data without the notice and consent required by law.

14. Legal disclosures

We may preserve or disclose information when reasonably necessary to comply with law, valid legal process, or a binding order; protect rights and security; investigate fraud or abuse; or address a threat of death or serious physical injury. We review requests and seek to narrow or challenge overbroad requests where appropriate and lawful.

15. Children

The Service is not directed to children and may not be used by anyone under 18. We do not knowingly collect personal information from a child. If you believe a child has provided information, contact [PRIVACY EMAIL]. We will investigate and delete it as required.

16. State-specific disclosures

Consumer health and comprehensive state privacy laws may provide additional rights. BioStack applies the request process in Section 9 to all verified U.S. users where reasonably practicable, even when a particular law does not apply.

For Washington and similarly protected consumer health data, this Policy identifies the categories collected, purposes, sources, categories of recipients, and request methods. Users may withdraw consent and request deletion, including deletion instructions to processors and affiliates where required.

For California residents, BioStack does not sell or share personal information as those terms are used for cross-context behavioral advertising. If BioStack later becomes subject to additional California notice or opt-out duties, it will update this Policy and honor applicable preference signals.

17. Changes to this Policy

We may update this Policy to reflect product, legal, or operational changes. We will post the new version and effective date. We will provide prominent notice of material changes and request renewed affirmative consent before making a materially new use of previously collected consumer health data where required.

18. Contact and appeals

Privacy requests and questions: privacy@biostack.com

Appeals: [PRIVACY APPEALS EMAIL OR SAME PRIVACY EMAIL WITH SUBJECT "APPEAL"]

Security reports: security@biostack.com

General support: support@biostack.com

Mail: BioStack - 1800 Twin Branch Dr., Marietta, GA 30062

If we deny an appeal, we will provide any regulator or attorney-general complaint information required by applicable law.

BioStack Calculator Safety Notice

Version: 0.10.0-draft

Effective date: August 28, 2026

Read before using any calculator

BioStack calculators perform mathematical conversions using the numbers, units, and assumptions entered by the user. They do not prescribe or recommend a dose, concentration, schedule, route, substance, vial, syringe, or protocol. No calculator output means that a substance, amount, combination, preparation, or administration is safe, effective, lawful, sterile, correctly labeled, or appropriate for any person.

What calculators do not verify

A calculator cannot verify:

- the identity, purity, potency, approval status, or labeling of a substance;
- whether a vial, syringe, diluent, route, preparation, or technique is appropriate or sterile;
- whether entered mass, concentration, volume, unit, or device markings are correct;
- interactions, contraindications, allergies, health conditions, laboratory values, or individual risk;
- whether a professional instruction was understood or transcribed correctly; or
- whether a displayed result is clinically suitable.

Required user checks

Before relying on any mathematical output, you must:

1. confirm every source instruction with a properly licensed clinician or pharmacist;
2. independently verify the formula, units, decimal placement, concentration, and result;
3. confirm that the selected units and device markings match the original instruction;
4. stop if information is missing, ambiguous, inconsistent, or surprising; and
5. avoid using the output to prepare, administer, or change a substance unless a qualified licensed professional has independently confirmed the instruction and calculation.

BioStack's display of a mathematical result is not an instruction to act.

High-risk and prohibited use

Do not use BioStack calculators for emergency care, pediatric use, veterinary use, chemotherapy, anesthesia, critical-care medication, insulin adjustment, opioid conversion, anticoagulation, or any other use where a calculation error could foreseeably cause serious harm. Do not use them to design a protocol, choose a dose, or convert an unverified internet suggestion into an administration instruction.

BioStack does not endorse or facilitate the purchase or use of investigational, unapproved, counterfeit, mislabeled, unlawfully obtained, or non-sterile products.

Error reporting

If you suspect a formula, unit, label, or display error, do not use the result. Capture the calculator name, application version, inputs with sensitive details removed, and expected behavior, then contact [SUPPORT OR SAFETY EMAIL].

Emergency notice

BioStack is not monitored for emergencies. If a substance may have been prepared or administered incorrectly, contact a licensed clinician, pharmacist, poison control center, or emergency service immediately. In the United States, call 911 for an emergency. The Poison Help line is 1-800-222-1222.

Acknowledgment

Before first use and after a material calculator change, the Service should require an unchecked acknowledgment substantially as follows:

"I understand that BioStack performs math only, does not select or approve a dose, and cannot determine whether any substance or administration is safe. I will independently verify the instruction, units, inputs, and output with a qualified licensed professional before acting."

BioStack Cookie Notice

Version: 0.10.0-draft

Effective date: August 28, 2026

Initial-release decision

BioStack uses only strictly necessary cookies and comparable local technologies in the initial release. Advertising cookies, cross-site tracking, session replay, fingerprinting, and non-essential analytics are disabled.

Strictly necessary technologies

Strictly necessary technologies may be used to:

- authenticate a user and maintain a requested session;
- prevent fraud, abuse, cross-site request forgery, and other security threats;
- route traffic and preserve service availability;
- remember privacy or accessibility choices; and
- remember a privacy or accessibility choice or preserve user-requested session state on the device.

These technologies are not used for targeted advertising or sale of personal information. Disabling them may prevent the Service from functioning.

Current register

The current application code identifies the register below. Before publication, the operator must capture a production session and confirm the exact cookie name, duration, Secure/HttpOnly/SameSite attributes, and absence of additional cookies or local-storage keys.

Name	Provider	Purpose	Type	Duration
biostack_session	BioStack	Passwordless authentication and session integrity	Strictly necessary; Secure, HttpOnly, SameSite=Lax in production	30 days; persistent; no sliding expiration

Future non-essential technologies

BioStack may not enable a non-essential cookie or tracker until it has:

1. documented the provider, data fields, purpose, recipients, duration, and jurisdictions;
2. completed privacy, security, and consumer-health-data review;
3. updated this Notice and the Subprocessor List if applicable;
4. implemented prior consent where required, with reject as easy as accept;
5. blocked the technology until consent is received;
6. provided a persistent preference control and honored withdrawal; and

7. verified that no consumer health data is disclosed for advertising or independent provider use.

Browser and device controls

You may use browser or device settings to delete or block local technologies. Some strictly necessary features may stop working. If BioStack later participates in a legally recognized browser preference signal, the Privacy Policy will explain how it is honored.

Contact

Questions about cookies and local technologies: privacy@biostack.com

BioStack Subprocessor List

Version: 0.10.0-draft

Last updated: August 28, 2026

Current authorization posture

BioStack uses the providers listed below to operate current hosted features. No advertising or analytics subprocessor is authorized.

GitHub is used for source hosting and continuous integration and is not authorized to receive BioStack user data.

Production register

Provider legal name	Service	Data categories	Processing location	Transfer mechanism	Retention or deletion	Effective date
Microsoft Corporation (Microsoft Azure)	Application hosting and PostgreSQL database	Account, contact, consumer health/protocol, calculator, consent, technical, security, and audit data	United States; configured Azure regions to be operator-confirmed	Not applicable to the U.S.-only launch; counsel to confirm	Per Sections 8-10; primary deletion instructions and backup aging apply	August 28, 2026 (draft)
Stripe, Inc. (contracting entity to confirm)	Payment and subscription processing	Billing contact, customer/subscription identifiers, transaction status, and payment data handled by Stripe	United States and other locations under Stripe's terms	Not applicable to the U.S.-only launch; counsel to confirm	Under Stripe's terms and applicable financial/tax law; operator and counsel to confirm	August 28, 2026 (draft)

Provider requirements

An approved provider must be bound to:

- process personal information only for documented BioStack purposes;
- maintain safeguards appropriate to consumer health data;
- notify BioStack promptly of incidents and government requests where lawful;
- assist with access, export, correction, deletion, and audit obligations;

- delete or return information at termination;
- prohibit sale, advertising use, model training, and independent profiling unless separately and lawfully authorized; and
- impose equivalent protections on any approved downstream provider.

Change notice

BioStack will update this page before a new provider begins processing consumer health data. Where a contract or applicable law requires advance notice or a right to object, BioStack will provide it.
